Order from LC or SLA ml\$2.40, ph\$3.30 61-15403

Trans. of Zhurnal Prikladnoy Khimii (USSR) 1951, v. 24, no. 4, p. 353-360.

An empirical formula is suggested for calculating the relative conductance; this formula is applicable for spherical inclusions with any packing of the volume, and for cylindrical inclusions with packings not exceeding 0.4 of the total volume. A comparison is made between the experimental results obtained and the theoretical formulas put forward by Rayleigh, also between certain experimental data which were available in the literature.
